Carbon Building

FCI Constructors of Wyoming, LLC the CMAR (Construction Manager at Risk) for the Courthouse and Carbon Building Improvement Project mobilized on site at the Carbon Building in early September to begin select demolition of the 1st Floor. As of November 2nd, the project is fully underway and changes are happening. The interior of the first floor is completely demolished and removed from the site. The new front entry to the Carbon Building has started with new foundation support to the existing building along with new foundations for the added vestibule and new elevator and stairs. Things will begin to change more rapidly as we move forward with construction on the Carbon Building. Below is a timeline of the entire project in three distinct phases.

Carbon Building - Phase 1, 1st Floor	November 2020 - July 2021
Phase 2, 2nd Floor	July 2021 - February 2022
Courthouse - Phase 3 - Entire building	February 2022 - February 2023
