

How to Learn Your Flood Risk

Review Carbon County's Preliminary maps at <https://arcg.is/1yC4n10>

Click on icon for legend

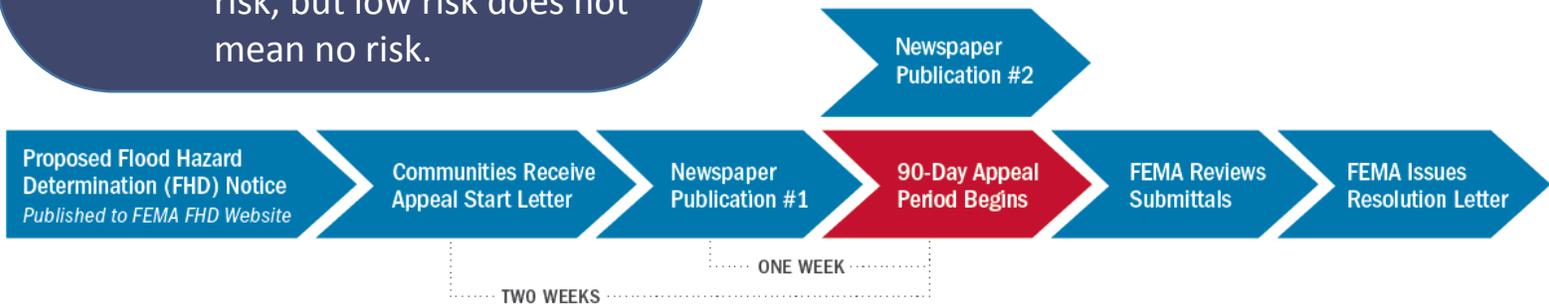

-  A
 -  AE
 -  AE, FLOODWAY
 -  X
- Zones AE, A, and AE with Floodway are high-risk, and flood insurance is mandatory for homes with government-backed mortgages
 - Zone X is moderate risk, and flood insurance is recommended but not mandatory
 - Unshaded properties are low-risk, but low risk does not mean no risk.

Current Phase of Risk MAP Process

Carbon County is currently in the 90 day appeal period of the Risk Mapping, Assessment and Planning Process (Risk MAP)

The 90 day comment and appeal process started for Carbon County on April 21, 2021. During the 90 day appeal period, any owner or lessee of real property in the community who believes his or her property rights will be adversely affected by the proposed flood hazard determinations may appeal the County or local jurisdiction. The respective jurisdiction would be submitting this appeal to FEMA on behalf of the private property owner or lessee. However, the sole basis for such appeals is the possession of knowledge or information indicating that the proposed flood hazard determinations are scientifically or technically incorrect. Appeals must be submitted within the 90 day appeal period, be signed by a certified land surveyor or professional engineer, and submitted by community leaders.

For more information on the appeal process, please reach out to either the listed County or FEMA contact.

After the 90 day comment and period, FEMA will resolve all comments and appeals, finalize the maps, and issue a **Letter of Final Determination**. When that letter is issued, all communities have **six (6) months** to amend their floodplain regulations and adopt the new maps. When the new maps are adopted they will be considered the official regulatory products used for floodplain management and flood insurance requirements.
